I'm a recent graduate with a Bachelor's degree in Computer Science. I have good skills in Java, SQL, HTML and CSS. I worked on some basic projects to solidify my programming foundation. These experiences have given me a solid understanding of software development principles and practices. My technical skills, enthusiasm for continuous learning, and problem-solving mindset make me a strong fit for the entry level role. I am eager to contribute to your team and thrive as a software developer.

Projects:

Car Rental System:

- **Java-based:** Utilized Collections Framework (Array List), methods, constructors, and OOP principles.
- **Classes:** Managed car details, customer details, and rental transactions.
- **Core System:** Maintained lists and included methods for adding, finding, renting, and returning cars and customers.
- **Main Class:** Set up the system and initiate user interaction via a menu.

Cafe Bill generator:

- **Developed a billing system for a cafe:** using Java, featuring menu display, order processing, and bill generation.
- **Implemented classes:** for menu items and customer details, ensuring modular and maintainable code.
- **Utilized data structures:** like lists to manage menu items, orders, and customers efficiently.
- **Enhanced user interaction:** with a command-line interface for seamless order placement and billing.

Skills:

Technical Skills	Java, DSA (Data Structures and Algorithm), OOPS, SQL, HTML and CSS
Techniques	SDLC (Software Development Life Cycle), Agile Methodology
Soft Skills	Analytical Thinker, Attention to detail, Good Ethics, Communication Skills, Collaborative, Active Listener, Flexible to work environment, Creative.

Education:

B. Tech: DIT University, Dehradun

High School: Aryaman Vikram Birla Institute of Learning, Haldwani

Certifications:

Hiltron Calc: Core Java

Geeks for Geeks: DSA and Java
